No. 30-77

TITLE/SIGNIFICANCE: Reverse "h"-shaped revetments associated with SCALEBOARD (SS-12)

COMMENT: Unique, reverse "h"-shaped revetments have been constructed recently at Sary Ozek and at Kupustin Yar. At Sary Ozek, on [] two of these revetments contained SCALEBOARD TEL, each with its URAL375 support van in the characteristic right-front launch sequence position. SCALEBOARD is not normally revetted for firing. Other sightings of the "h" revetments should be reported to the WPFD TAC SSM project officer, R. Betz. The erected missiles at Sary Ozek had modified airframes and a white area below the nosecone (see reverse).

TOP SECRET RUFF

MODIFIED SCALEBOARD (SS-12)

25X1

25X1

25X1

NOTE: There is some conjecture within the community that the light coloured area beneath the nose-cone, and the modification (protrusion) of the airframe, are possibly indicative of the SS-X-22 (KY-12)
